

Angle seat valves VZXF

FESTO

Festo core product range
Covers 80% of your automation tasks

Worldwide:
Superb:
Easy:

Always in stock
Festo quality at an attractive price
Simplified procurement and warehousing

★ Generally ready for dispatch from the factory within 24 hours
In stock at 13 Service Centres worldwide
More than 2200 products

★ Generally ready for dispatch from the factory within 5 days
Assembled for you at 4 Service Centres worldwide
Up to 6×10^{12} variants per product family

for the
star!

Characteristics

Function

Angle seat valves are externally controlled valves. They are directly actuated using compressed air supply. In this process, the seat of the process valve is raised by a pneumatic actuator. In the normal position, the valve is closed by a spring. When the

actuator is supplied with operating pressure, it raises the control piston as well as the valve disc – the valve opens. The valve seat is slanted at an angle of approx. 50° in relation to the media flow. The flow direction is determined by the design of the valve.

Angle seat valves are used in applications in which absolute purity of the medium cannot be ensured, in which high-viscosity media are to be controlled or in vapour applications.

Design

-  - Connecting thread
G1/2 ... G2

-  - Flow rate Kv
3.3 ... 47.5 m³/h

- Gunmetal (red brass) variant
- Stainless steel casting variant
- Stainless steel casting variant, nickel-plated actuator head

General information

- Angle seat valves are simple and sturdy and are thus perfectly suitable for almost all media with a viscosity of up to 600 mm²/s
- Angle seat valves control suitable gaseous and liquid media in rigid piping systems without the need for any pressure differential
- No differential pressure required between the input and output
- Low flow resistance
- Insensitive to vapour or slightly contaminated media
- Long service life
- Low maintenance
- The valves have a high chemical and thermal resistance thanks to their design
- The NC function ensures that the valve is closed in the event of pressure loss in the control circuit
- Angle seat valves are available in different designs depending on the pressure of the medium
- There is a choice of two versions: "closing in the direction of media flow" is used for gaseous media. "Closing against the direction of media flow" is used for liquid media

Explosion protection

- ATEX certification is used in production areas which are potentially explosive in certain conditions. The angle seat valves VZXF are certified for use in equipment group II, equipment category 2

PWIS-free

- PWIS-free is chosen for use in production areas in which the influence of paint-wetting impairment substances must be avoided at all costs

Vacuum version

- The version that is suitable for vacuum is used in packaging machines which need to generate a vacuum

Characteristics

Examples of versions, each available with G or NPT thread

1) Corrosion resistance class CRC 0 to Festo standard FN 940070

No corrosion stress. Applies to small, visually unimportant standard parts such as threaded pins, circlips and clamping sleeves which are usually only available on the market in a phosphated or burnished version (and possibly oiled) as well as to ball bearings (for components < CRC 3) and plain bearings.

Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

1) Corrosion resistance class CRC 0 to Festo standard FN 940070

No corrosion stress. Applies to small, visually unimportant standard parts such as threaded pins, circlips and clamping sleeves which are usually only available on the market in a phosphated or burnished version (and possibly oiled) as well as to ball bearings (for components < CRC 3) and plain bearings.

Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

Gunmetal (red brass), PWIS-free

Function

Flow rate Kv
3.7 ... 16.5 m³/h

Connecting thread
G1/2 ... G1 1/2

General technical data

Line connection	G1/2	G3/4	G1	G1 1/2
Nominal width DN [mm]	12	16	23	35
Design	Poppet valve with piston drive			
Actuation type	Pneumatic			
Type of mounting	In-line installation			
Line connection	Threaded coupling to DIN ISO 228-1			
Sealing principle	Soft			
Mounting position	Any			
Valve function	2/2-way, closed, monostable			
Pneumatic connection	Female thread G1/8			
Flow direction	Non-reversible			
Type of control	Externally piloted			
Reset method	Mechanical spring			
Exhaust air function	Cannot be throttled			
Flow direction	Under valve seat, for gaseous and liquid media			

Operating and environmental conditions

1) Corrosion resistance class CRC 1 to Festo standard FN 940070

Low corrosion stress. Dry internal application or transport and storage protection. Also applies to parts behind coverings, in the non-visible interior area, and parts which are covered in the application (e.g. drive trunnions).

Corrosion resistance class CRC 2 to Festo standard FN 940070

Moderate corrosion stress. Indoor applications in which condensation can occur. External visible parts with primarily decorative surface requirements which are in direct contact with a normal industrial environment.

Stainless steel casting, vacuum version

1) Corrosion resistance class CRC 3 to Festo standard FN 940070

High corrosion stress. Outdoor exposure under moderate corrosive conditions. Externally visible parts with primarily functional surface requirements which are in direct contact with a normal industrial environment.

Stainless steel casting, nickel-plated actuator head

Function

Flow rate Kv
3.3 ... 34.5 m³/h

- - 1/2 NPT ... 2 NPT

General technical data						
Line connection	1/2 NPT	3/4 NPT	1 NPT	1 1/4 NPT	1 1/2 NPT	2 NPT
Nominal width DN [mm]	13	18	24	31	35	45
Design	Poppet valve with piston drive					
Actuation type	Pneumatic					
Type of mounting	In-line installation					
Line connection	Threaded coupling to ANSI/ASME B 1.20.1					
Sealing principle	Soft					
Mounting position	Any					
Valve function	2/2-way, closed, monostable					
Pneumatic connection	Female thread G1/8					
Flow direction	Non-reversible					
Type of control	Externally piloted					
Reset method	Mechanical spring					
Exhaust air function	Cannot be throttled					
Flow direction	VZXF-...-A-...	Over valve seat, for gaseous media				
	VZXF-...-B-...	Under valve seat, for gaseous and liquid media				

Operating and environmental conditions						
Line connection	1/2 NPT	3/4 NPT	1 NPT	1 1/4 NPT	1 1/2 NPT	2 NPT
Valve nominal pressure PN	40					
Operating medium	Compressed air to ISO 8573-1:2010 [7:4:4]					
Operating pressure [bar]	6 ... 10					
Medium	Vapour					
	Inert gases					
	Filtered compressed air, grade of filtration 200 µm					
	VZXF-...-B-... additionally					
	Mineral oil-based hydraulic fluid					
	Mineral oil					
	Neutral fluids					
	Water					
Max. viscosity [mm ² /s]	600					
Ambient temperature [°C]	-10 ... +60					
Temperature of medium [°C]	-40 ... +200					
CE marking (see declaration of conformity) ¹⁾	-			To EU Pressure Equipment Directive		

¹⁾ Additional information is available at www.festo.com/sp → Certificates.

Materials	Material number
Valve housing	Stainless steel casting
Actuator housing	Nickel-plated brass
Spindle seal	PTFE
Seat seal	PTFE
Note on materials	Contains paint-wetting impairment substances
	RoHS-compliant

Stainless steel casting, nickel-plated actuator head
