

## LINCOLN ELECTRONIC WELDING MASKS

### ITEM: EUROONE

Latest generation electronic auto-darkening welding mask. Suitable for a range of welding processes, MMA - MIG - MAG, and grinding. Solar powered. No batteries required. Adjustable headgear with sweatband. Included: 2 external protective lenses, 2 internal protective lenses and 1 sweatband.  
Compliance: EN379 EN175 EN166

Variable shade: DIN 3.5/9-13  
Light to dark switching time 0.06 ms  
Arc sensors: 2  
Cartridge size: 110 x 90 mm  
Viewing area: 4,312 mm<sup>2</sup>

| Tech. Code |  | Power supply  | Weight<br>g |
|------------|--|---------------|-------------|
| J864010    |  | Solar powered | 490         |

## ELECTRONIC WELDING MASKS

### ITEM: TIGER TOP

Electronic masks for high performance welding, suitable for all welding processes. Equipped with a True Colour system that guarantees a true colour vision.  
Adjustment of the DIN 5 9/9 13 filter  
External control regulation and filter sensitivity  
4 dimming sensor, weight 510 g  
Dimming time 0.08 ms  
EU reference standards EN175 EN379

| Tech. Code |  | Power supply | SPARE PARTS                       |
|------------|--|--------------|-----------------------------------|
| J865010    |  | Solar cells  | -                                 |
| J865012    |  | -            | Internal glass protection (5pcs)  |
| J865014    |  |              | External glass protection (10pcs) |
| J865016    |  |              | Headgear for mask                 |

## COLOURLESS MINERAL-GLASS FLAT PLATE

### ITEM: J8670

Suitable for protecting adiacinic glass in welding masks.  
EU standard reference - EN 166 - Colorless, thickness 2 mm

| Tech. Code |  | Dimension<br>mm |  |
|------------|--|-----------------|---------------------------------------------------------------------------------------|
| J86701     |  | 75 x 98         |                                                                                       |

## ADIACTINIC MIRROR GLASS

### ITEM: J8672

Chromed surface, suitable for welding masks used.  
EU standard reference - EN 169 - Thickness 3 mm

| Tech. Code |  | Degree              | Dimension<br>mm |  |
|------------|--|---------------------|-----------------|---------------------------------------------------------------------------------------|
| J867210    |  | DIN 10 Light green  | 75 x 98         |                                                                                       |
| J867211    |  | DIN 11 Medium green |                 |                                                                                       |
| J867212    |  | DIN 12 Dark green   |                 |                                                                                       |

## ADIACTINIC GLASS

### ITEM: J8675

Suitable for welding masks.  
EU standard reference - EN 169 - Thickness 3 mm

| Tech. Code |  | Degree              | Dimension<br>mm |  |
|------------|--|---------------------|-----------------|---------------------------------------------------------------------------------------|
| J867509    |  | DIN 9 Light green   | 75 x 98         |                                                                                       |
| J867510    |  | DIN 10 Light green  |                 |                                                                                       |
| J867511    |  | DIN 11 Medium green |                 |                                                                                       |
| J867512    |  | DIN 12 Dark green   |                 |                                                                                       |
